Areas with the highest number of women with unmet need and the highest proportion of women with unmet need.

Areas with a high number of women with unmet need and a high proportion of women with unmet need.

Areas with a high number of women with unmet need but a low proportion of women with unmet need (may occur in areas with small populations of women with unmet need).

Areas with a low number of women with unmet need but a high proportion of women with unmet need (may occur in areas with small populations of eligible women).

Low number of women with unmet need, and low proportion of women with unmet need.

These estimates are intended to be used as a rough guide to identify areas of potential need for services. References to "providers" are to entities with one Medi-Cal provider number -i.e., billing units, not clinic sites. Estimates are not precise, especially when pertaining to regions of small population. Neither OFP nor UCSF accept responsibility for accuracy of these estimates.
